

What in the world are they thinking? XM Radio is the leading edge of entertainment Radio Communication. Digital service anywhere in the USA! For \$10.00 per month I can select the type of Music, Talk, and News I care to listen to. Most commercial free. I live outside Washington, D.C. I find the Weather & Traffic information accurate, necessary, and very usewful. I can also tune to a local FM WTOP news station to get similar updates. My choice - of course - would be to turn to the best option for this service. Right now - The best option is XM Satellite Radio. Every time a NEW TECHNOLOGY is introduced - everyone has to adjust to decide how it will affect our lives. XM Radio is one of the best things to happen to RADIO ENTERTAINMENT in years! I don't have to listen to broadcasters screaming to me over the FM and AM Radio stations and networks!

I Respectfully urge the FCC to reject the NAB's petition 04-160 - This really means that compitition in entertainment Radio has just gotten a little tougher. DO A BETTER JOB or BOW OUT!

John L. Grannis
